AN IMPORTANT MESSAGE TO YOU, FROM THE EDITOR... ABOUT THE NEW AMAZING!

# 30TH ANNIVERSARY 1962-1992 SPIDER-MAN

1. SEPTEMBER, 1962

Jack Kirby first did artwork for Spider-Man's debut in Amazing Fantasy #15, but it was not used. Stan Lee took him off the book and gave it to Steve Ditko who drew Spider-Man unlike the typical Superhero of that time. Steve Ditko drew the original cover, but Stan Lee asked for another angle. Ditko collaborated with Jack Kirby on the final version.

## 3. THE EXHIBITION

One night, during his sophomore year at Midtown High School, he attended a demonstration concerning the safe handling of nuclear waste, sponsored by the General Techtronics Laboratories East Corporation. During the exhibition, a particle accelerator irradiated a common house spider, which bit Peter.

1962-1992

# SPIDER-MAN!!

## 5. REFLEXES

Spider-Man's reflexes are faster than an average human by about a factor of 15. His reflexes are fast enough to allow himself to dodge bullets, if fired at a distance.

**NOTE:** Spider-Man is extraordinarily limber and his tendons and connective tissues are twice as elastic as the average human beings.

30TH ANNIVERSARY
1962-1992

# SPIDER-MAN

## 6. WALL CLIMBER

Spider-Man's hands and feet adhere at mental command to most surfaces allowing him to climb walls or hang upside down. He does this by mentally controlling the flux of inter-atomic attraction between molecular boundary layers. This ability to affect the attraction between surfaces is limited to Spider-Man's body (especially concentrated in his hands and feet) and another object.

SPIDER-MAN: TM & © 1992 Marvel Entertainment Group, Inc. All rights reserved. Produced by Comic Images, Saddle Brook, NJ 07662.

30TH ANNIVERSARY
1962-1992

# SPIDER-MAN

## 7. SPIDER-SENSE

A tingling sensation in the back of Spider-Man's skull warns him of danger. The pre-monitored "spider-sense" gives him several hundredths of a second's warning, which allows his super-reflexes to react. **Note:** Spider-Man can measure the severity of the danger by the strength of the tingling in his skull.

30TH ANNIVERSARY
1962-1992

# SPIDER-MAN

## 8. WEB-SHOOTERS

Spider-Man's form of transportation is swinging on web-lines emitted from his web-shooters. These are twin devices worn on his wrists that can shoot thin strands of a special "web fluid" at high pressure.

**Note:** The web lines are not only good for transportation but also as weapons.

SPIDER-MAN: TM & © 1992 Marvel Entertainment Group, Inc. All rights reserved. Produced by Comic Images, Saddle Brook, NJ 07662.

30TH ANNIVERSARY
1962-1992

# SPIDER-MAN!!

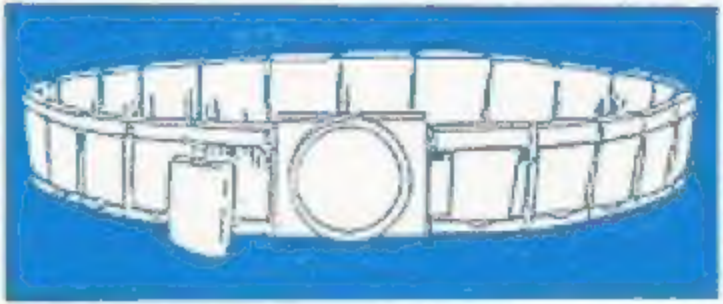
## 9. WEB FLUID

The web fluid is a sheer-thinning liquid whose exact formula is as yet not explained by Parker, but seems to be related to nylon. Once the fluid makes contact with air, it becomes an extremely tough, flexible fiber that has extraordinary adhesive properties. The web dissolves into dust after 2 hours.

SPIDER-MAN: TM & © 1992 Marvel Entertainment Group, Inc. All rights reserved. Produced by Comic Images, Saddle Brook, NJ 07662.

30TH ANNIVERSARY
1962-1992

# SPIDER-MAN!!



## 10. EQUIPMENT

Whenever Spider-Man is unable to pursue someone or something, he enlists the help of a miniature tracking device. Spider-Man can use his spider-sense to detect the signals the tracer emits. Along his waist line, covered by his costume, is Spider-Man's belt that holds extra cartridges for his web shooters. His belt buckle contains a miniature spotlight and an attachment where he can place his camera.
